

METAMORPHOSIS

EDUCATION AND INNOVATION TOOLS

The creation of awareness through the use of educative tools.

AIM

The aim is to create awareness raising tools, tools to encourage change and involve children in a playful way, yet effective way and enable them to specify and communicate their visions for our future cities and neighbourhoods. This measure also aims at including these tools within the curricula

GOALS

- To **prepare** the METAMORPHOSIS content in a way to make it accessible for teachers,
- To **empower** children to raise awareness within their families, with a focus on migrant families
- To make it **easier** for teachers to integrate the content in teaching materials and curricula, by supplying them with the necessary documents

Examples

School Environment Scan- Tilburg, Zurich and Meran

The School Environment Scan is developed as an answer to find new ways of translating the needs children in school environment. They children gave tips and tops and from this they tried to find new ways to deliver solutions in a creative way within a process of co-creation with all partners.

Living labs- Graz, Meran and Tilburg

Livin' labs are experiments with traffic calming measures around educational sites. Streets in front of the schools were used as an area for educational purpose and playing/recreational activities. This measure has raised awareness and involved parents and promoted the active modes of transportation.
